

# Exercise 1

## Objectives

- Use basic HTML elements
- Add an image
- Add an anchor tag

## Exercise Ideas

This is the first exercise for the HTML Basics lesson. You'll need to remember what the basic HTML structure looks like, how to use headings, paragraphs, simple links and images.

## Instructions:

1. Create a basic HTML page layout, with all important elements.
2. Set the page title to "A basic HTML example".
3. Include 2 or more headings for a semantic page structure.
4. Include the [DCI logo](#) with reduced size and link it to the [DCI website](#).
5. Include an additional text link to the [DCI website](#).
6. optional: Create your project on a [codepen](#).
